

# SIS DOGE

# Litepaper

# INTRODUCTION

Every day we see improvements in technology all around the world and almost all of the projects have the same goal, making everything easier for human. Cryptocurrency is the revolution started years ago but now in 2021, it could attract a large group of peoples attention.

but now in 2021, it could attract a large group of peoples attention. There are so many choices but not all of them are worthy, projects should be supported by the communities. There is something very important which is accepting the risk and being able to recognize the scam projects. Usually large number of investors only check the KYC and audit which is good but not enough, we should also check the dump possibility. Unfortunately lots of the projects hold huge amount of the tokens which makes it risky to invest in their project but still most of the people don't pay attention and many of them lose their funds, thats where our project becomes more attractive to the investors. In last few years people are more involved in projects with passive income, our project is going to help our community members to have a passive income which is generated by taxes of our services. NFT marketplace, DEX, Stacking services and in next four years KYC, Audit and Launchpad. All the details will be shared with the community members before starting the services.

# What is SisDoge?

SisDoge is utility token of SisDoge Project which has the mission of providing crypto services with low cost and high security. With holding \$ISDOGE you can use the services.

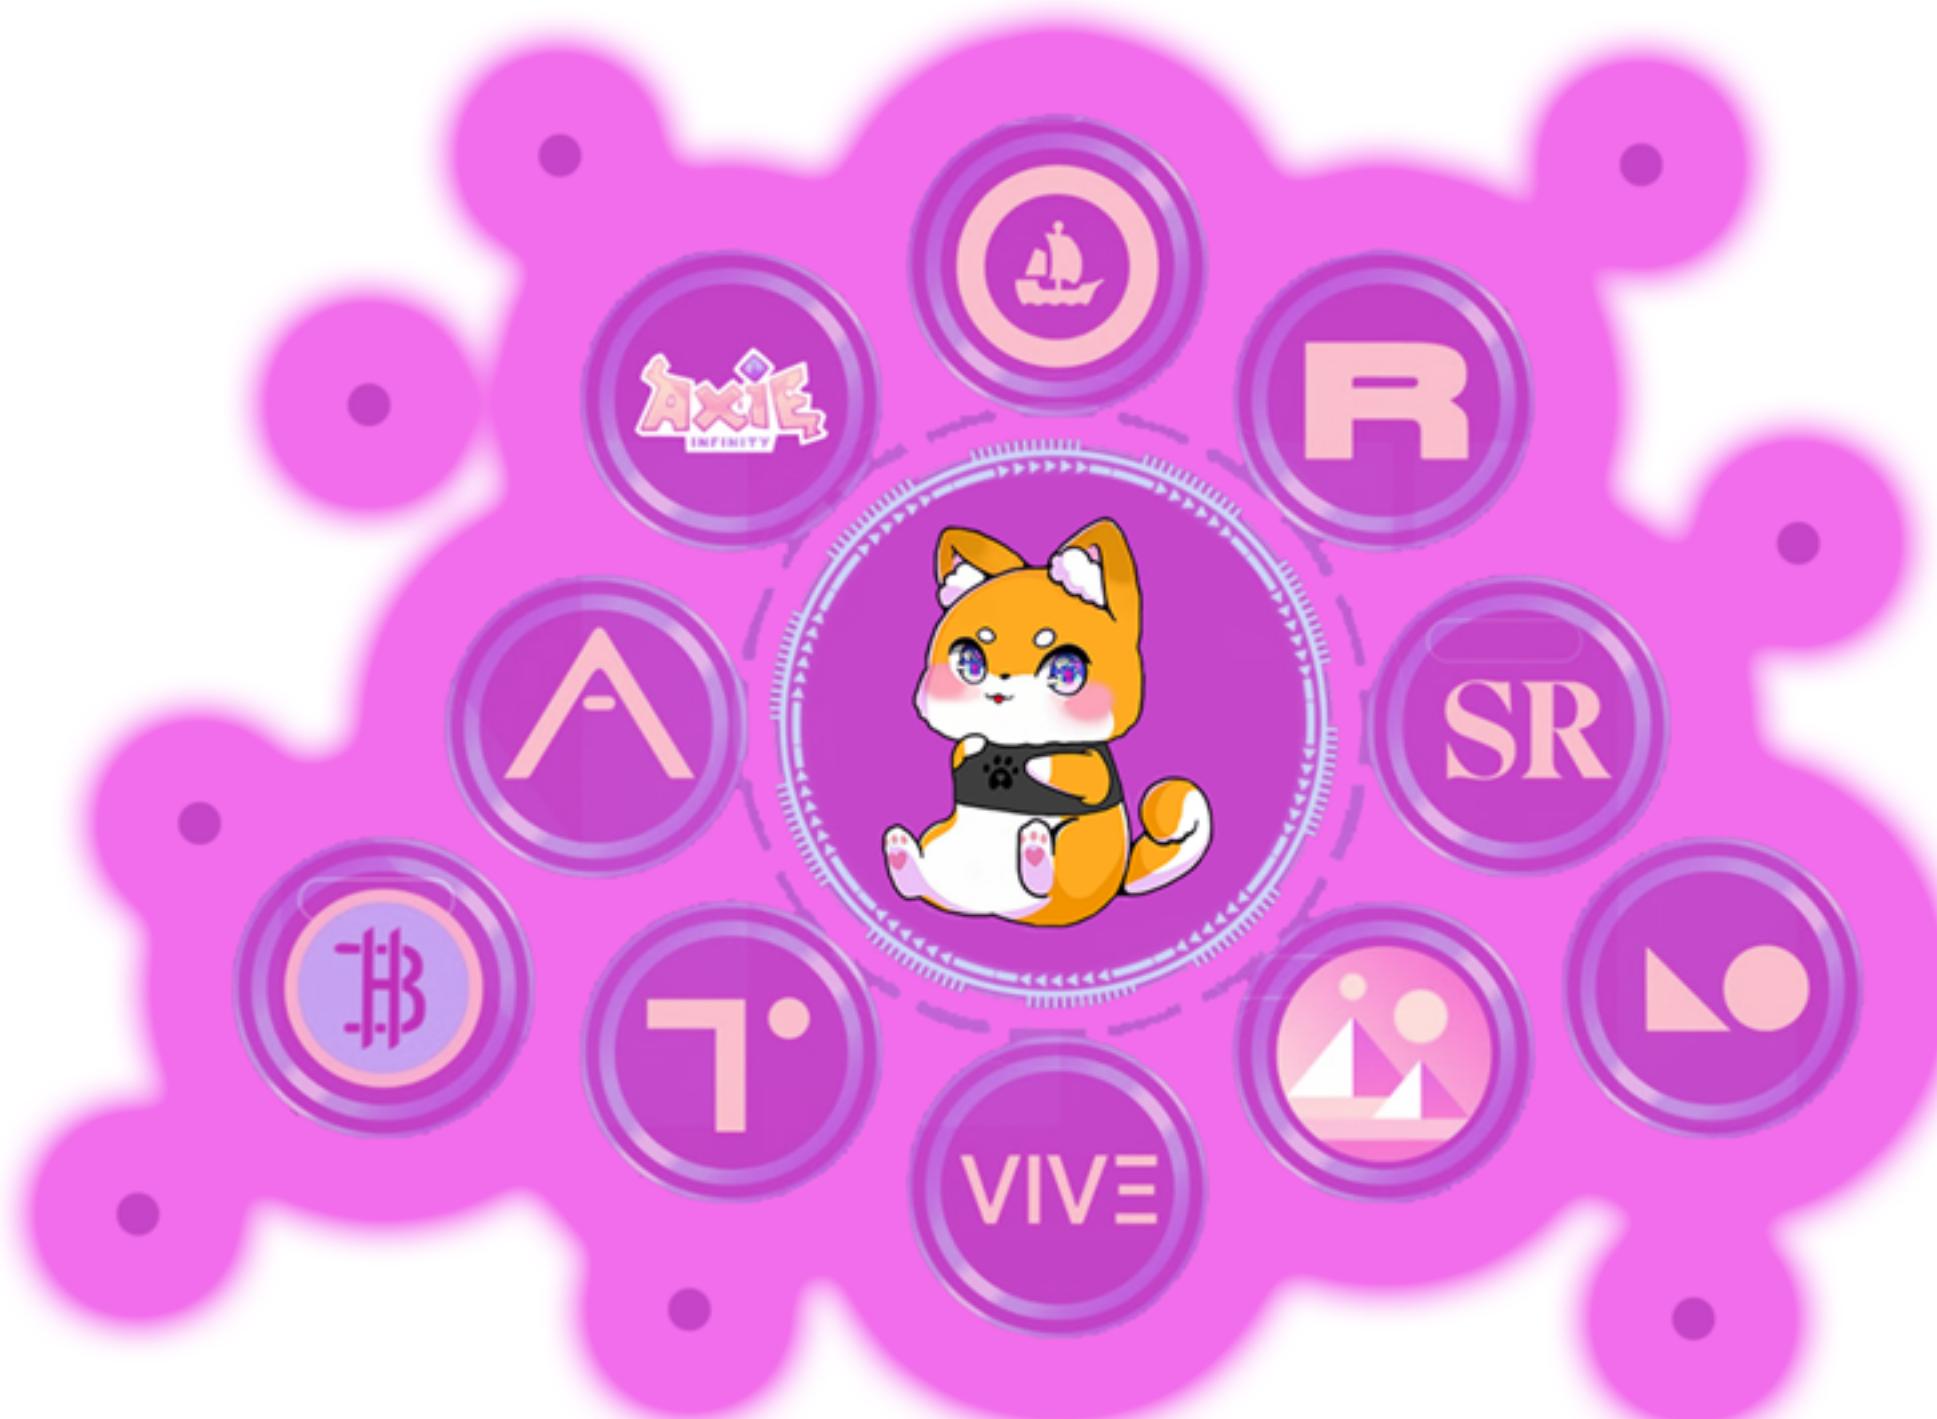

## What is the benefit of holding \$ISDOGE?

You can have a passive income with holding \$ISDOGE and use our crypto services. A low risk investment generates interest for investors and can be sold anytime.

## What are the SisDoge Projects?

A group of protocols which is going to be available on BSC. Low cost and high security, this is necessary for any project. We are planning to expand our token on other blockchains also but its not our priority currently.

As we said before, Audit and KYC is not enough and we need more details about any project to make sure its not scam. Lots of the projects hold a huge number of tokens for themselves, so they can dump as soon as they can but we make sure our community members trust us by holding less than 8% of total token which is not fully unlocked.

8% of the total token is available in Dev Wallet. 1% is owned by the team and its locked for 18 months. 1% airdrop is also locked for 2 months, as soon as it gets unlocked we start the airdrop program. Anti-Whale method will make it so hard to become a whale and dump the tokens.

5% tax is allocated on every transfer. Including 2% holders, 1% burn, 1% liquidity and 1% monthly lottery. The results of the lottery will be announced in our official telegram channel. We have the ability to cancel all the fees when it's necessary.

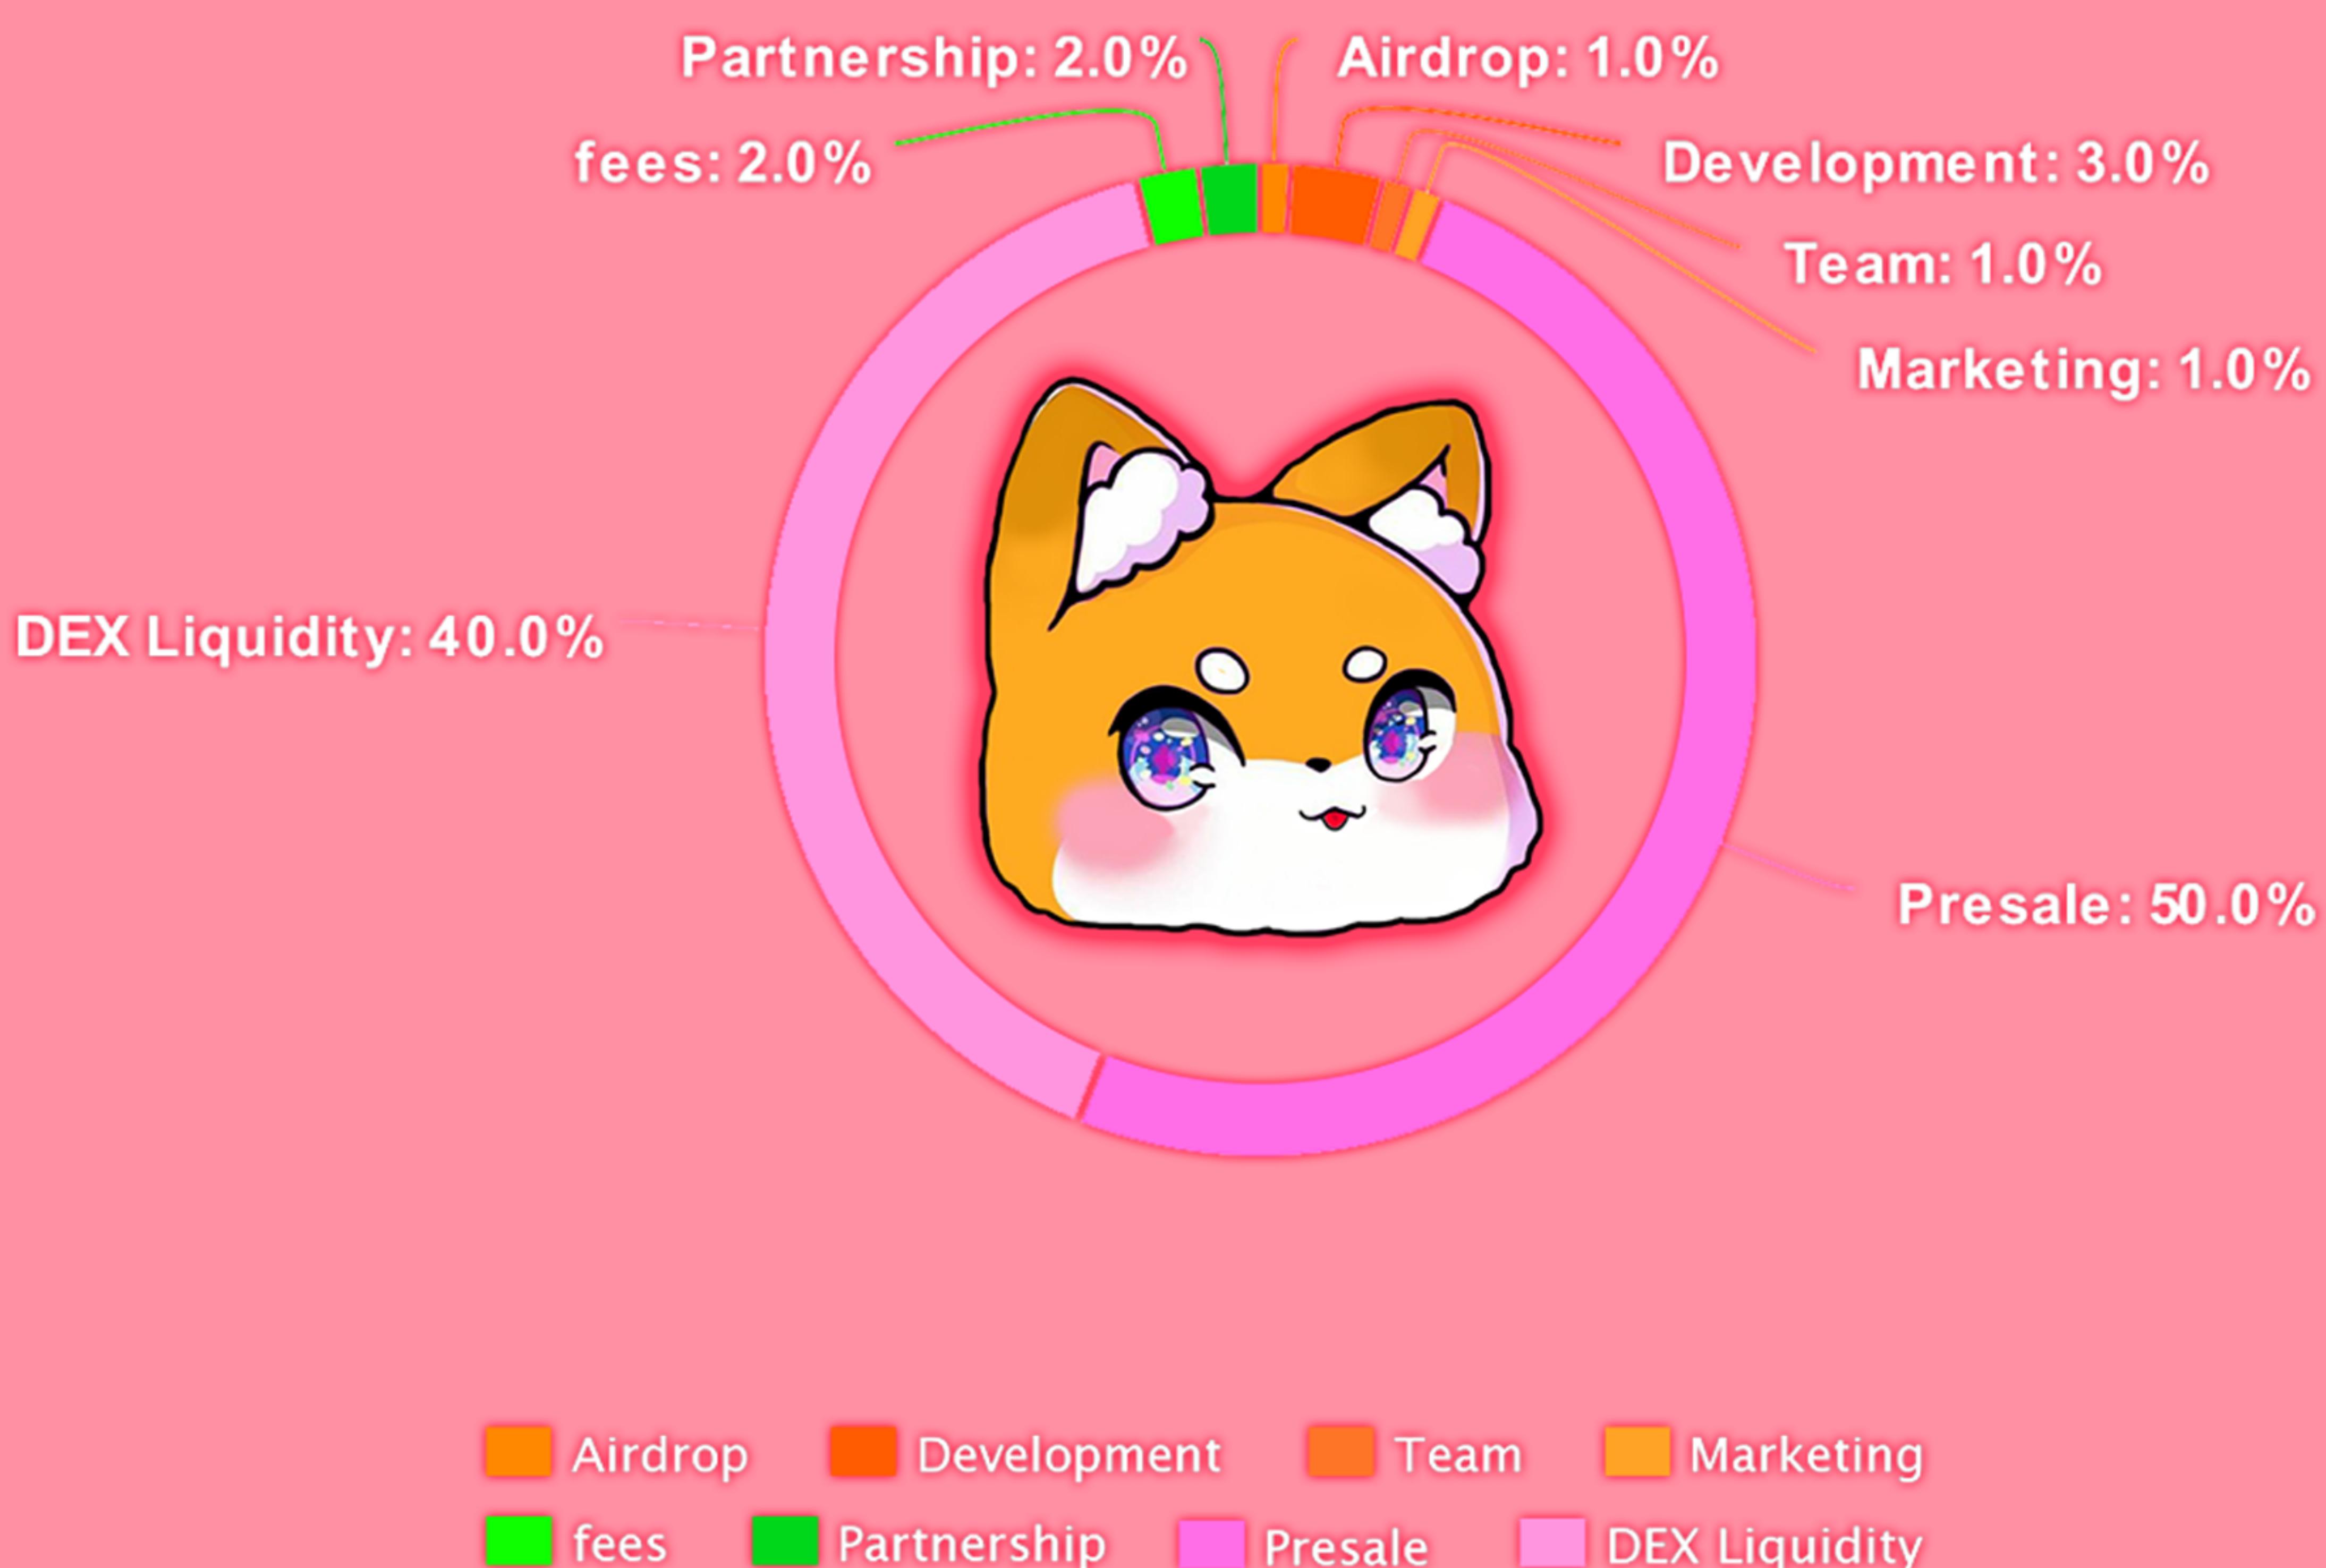

# SECURITY

Trust and security is always the most important part, we always try to choose the way that cause investors and our community members to feel safe. Having small Dev Wallet is just one of the methods we are using, having audit as soon as we deploy our contracts is another one. After checking the Audit report you can make sure there is no major vulnerabilities. When presale is finished, liquidity pool will be created in PancakeSwap(V2) and anyone can buy/sell \$ISDOGE. Before we start presale we locked the tokens we had as we mentioned before.

# TOKENOMICS

- 50% Presale ( ILO )
- 40% DEX Liquidity
- 03% Development ( New contracts and dapps for Ecosystem )
- 02% Partnership ( strategic partnership & agreement )
- 02% Fees ( ILO and listing )
- 01% Team ( Fully Locked in team.finance for 18 months )
- 01% Marketing
- 01% Airdrop (Community rewards & Airdrops Events, Fully Locked in team.finance for 3 months)

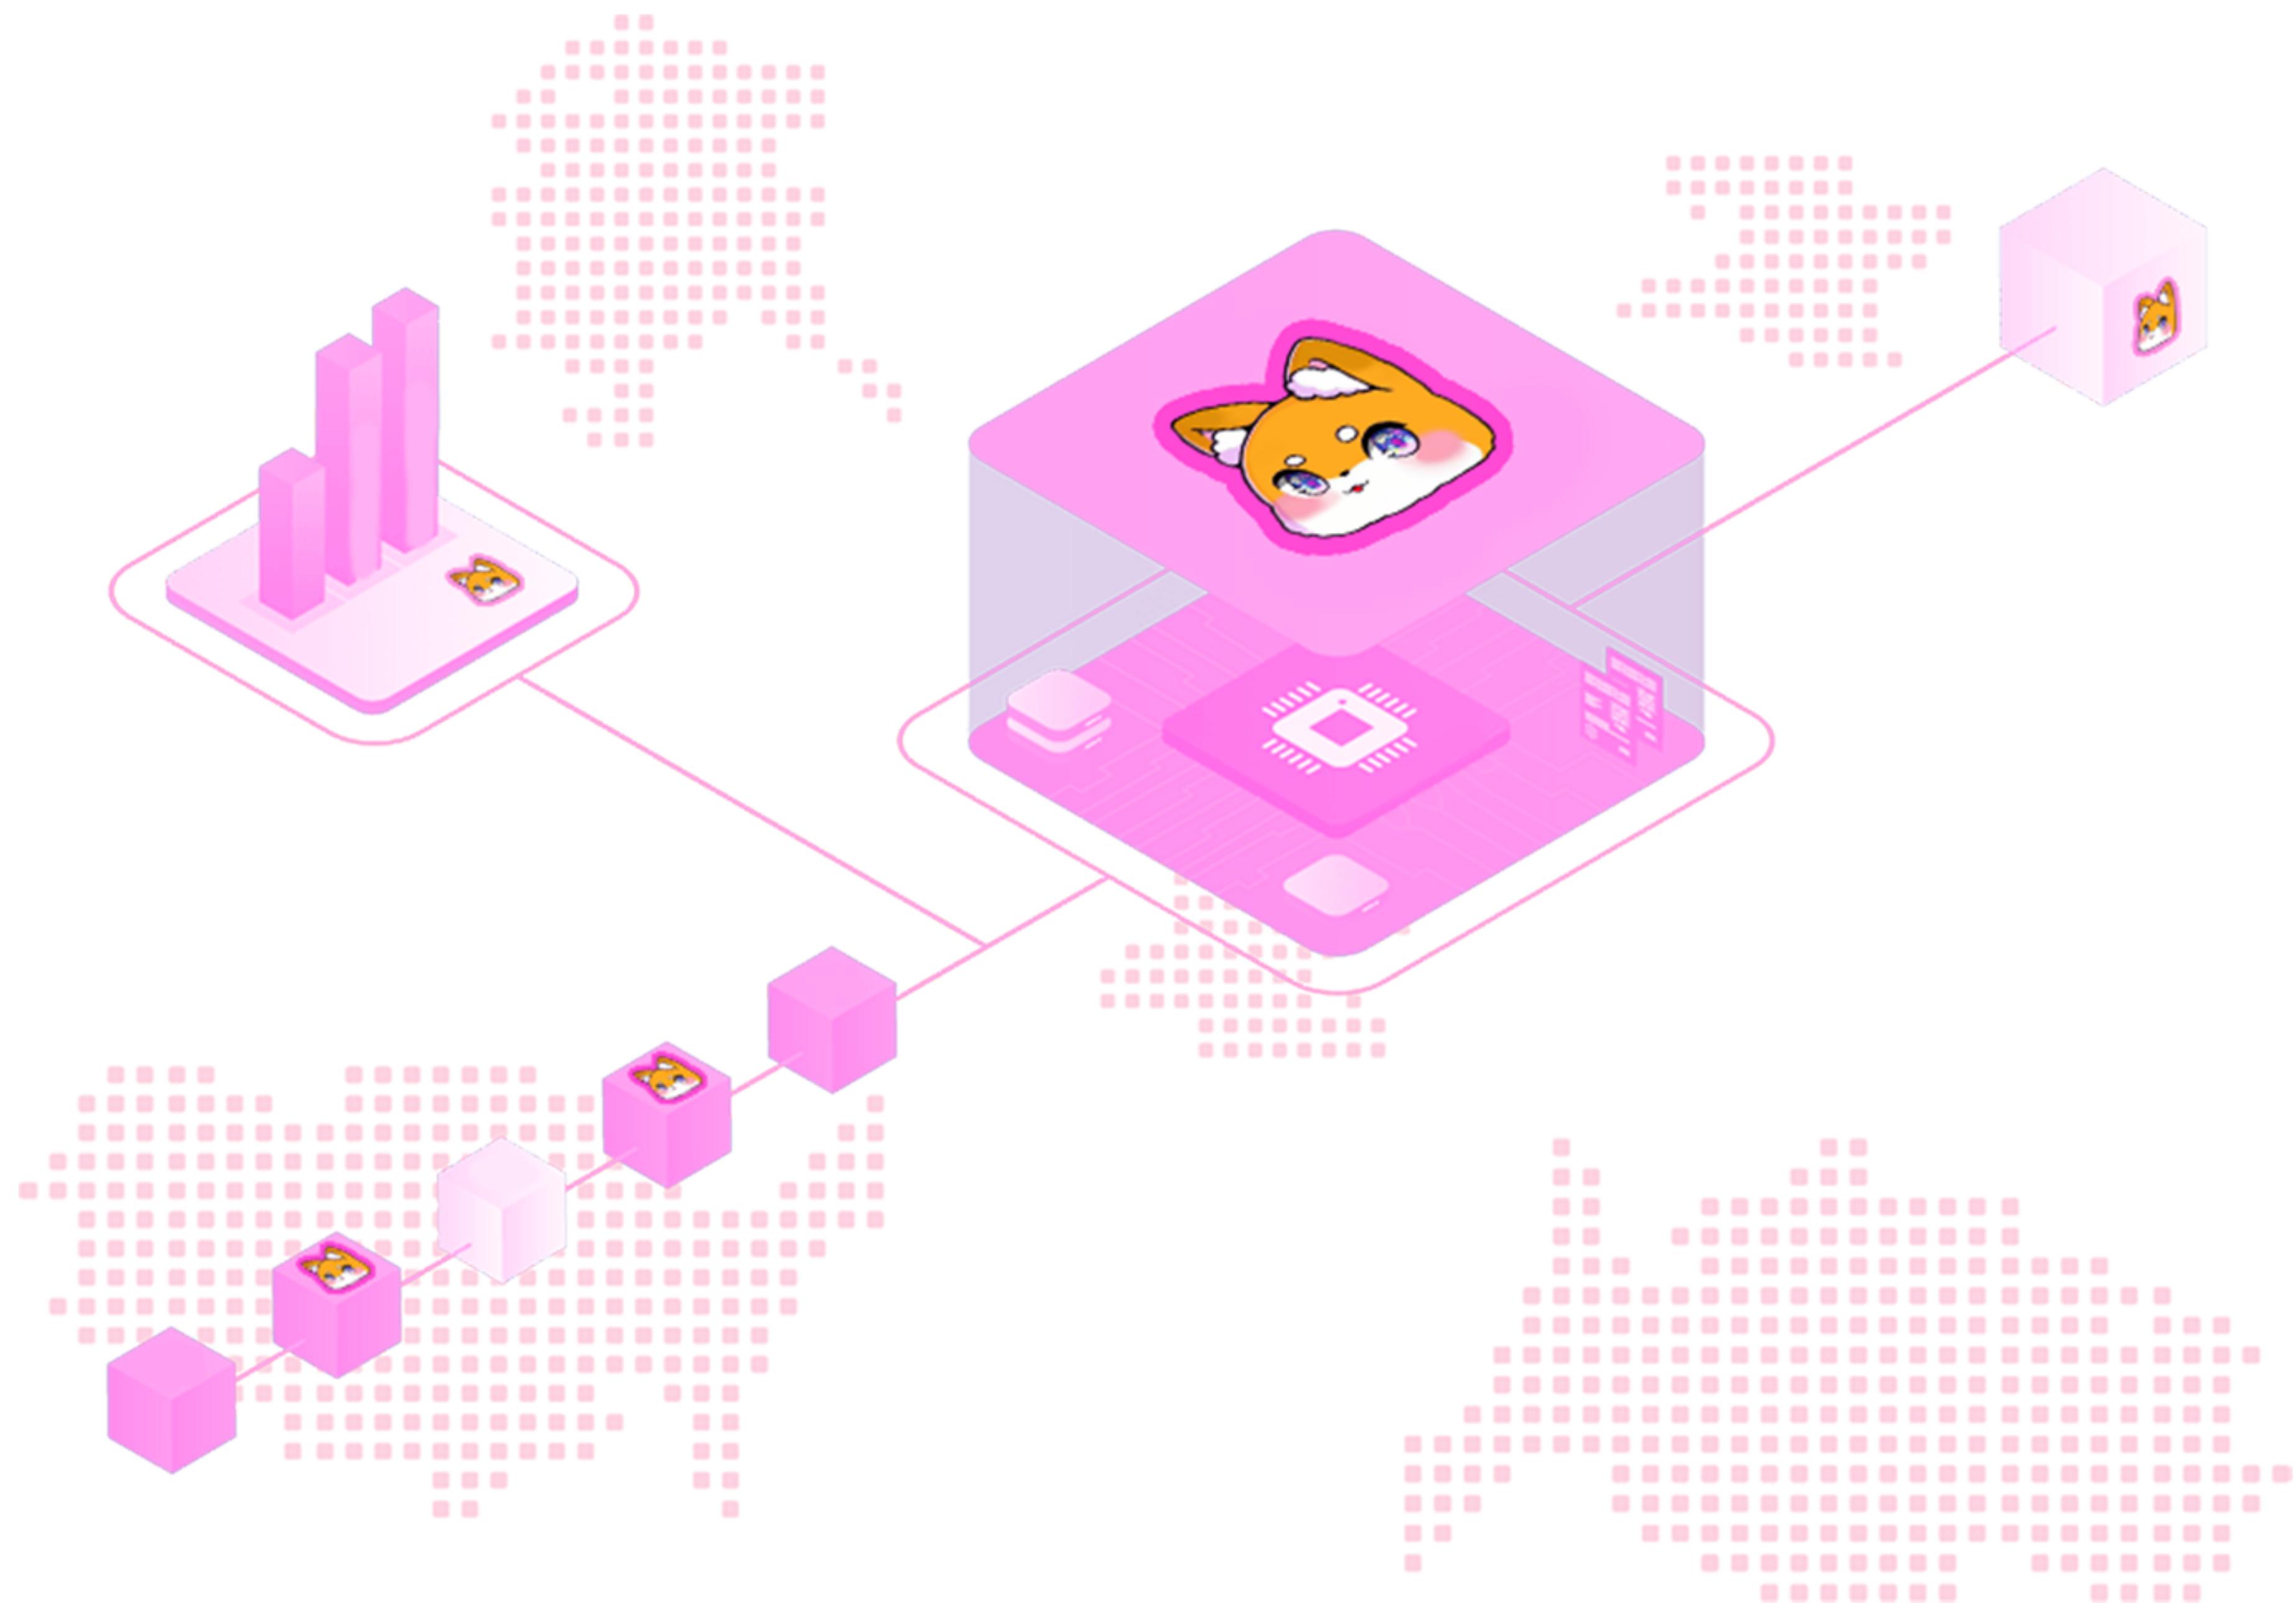

# PARTNERSHIP

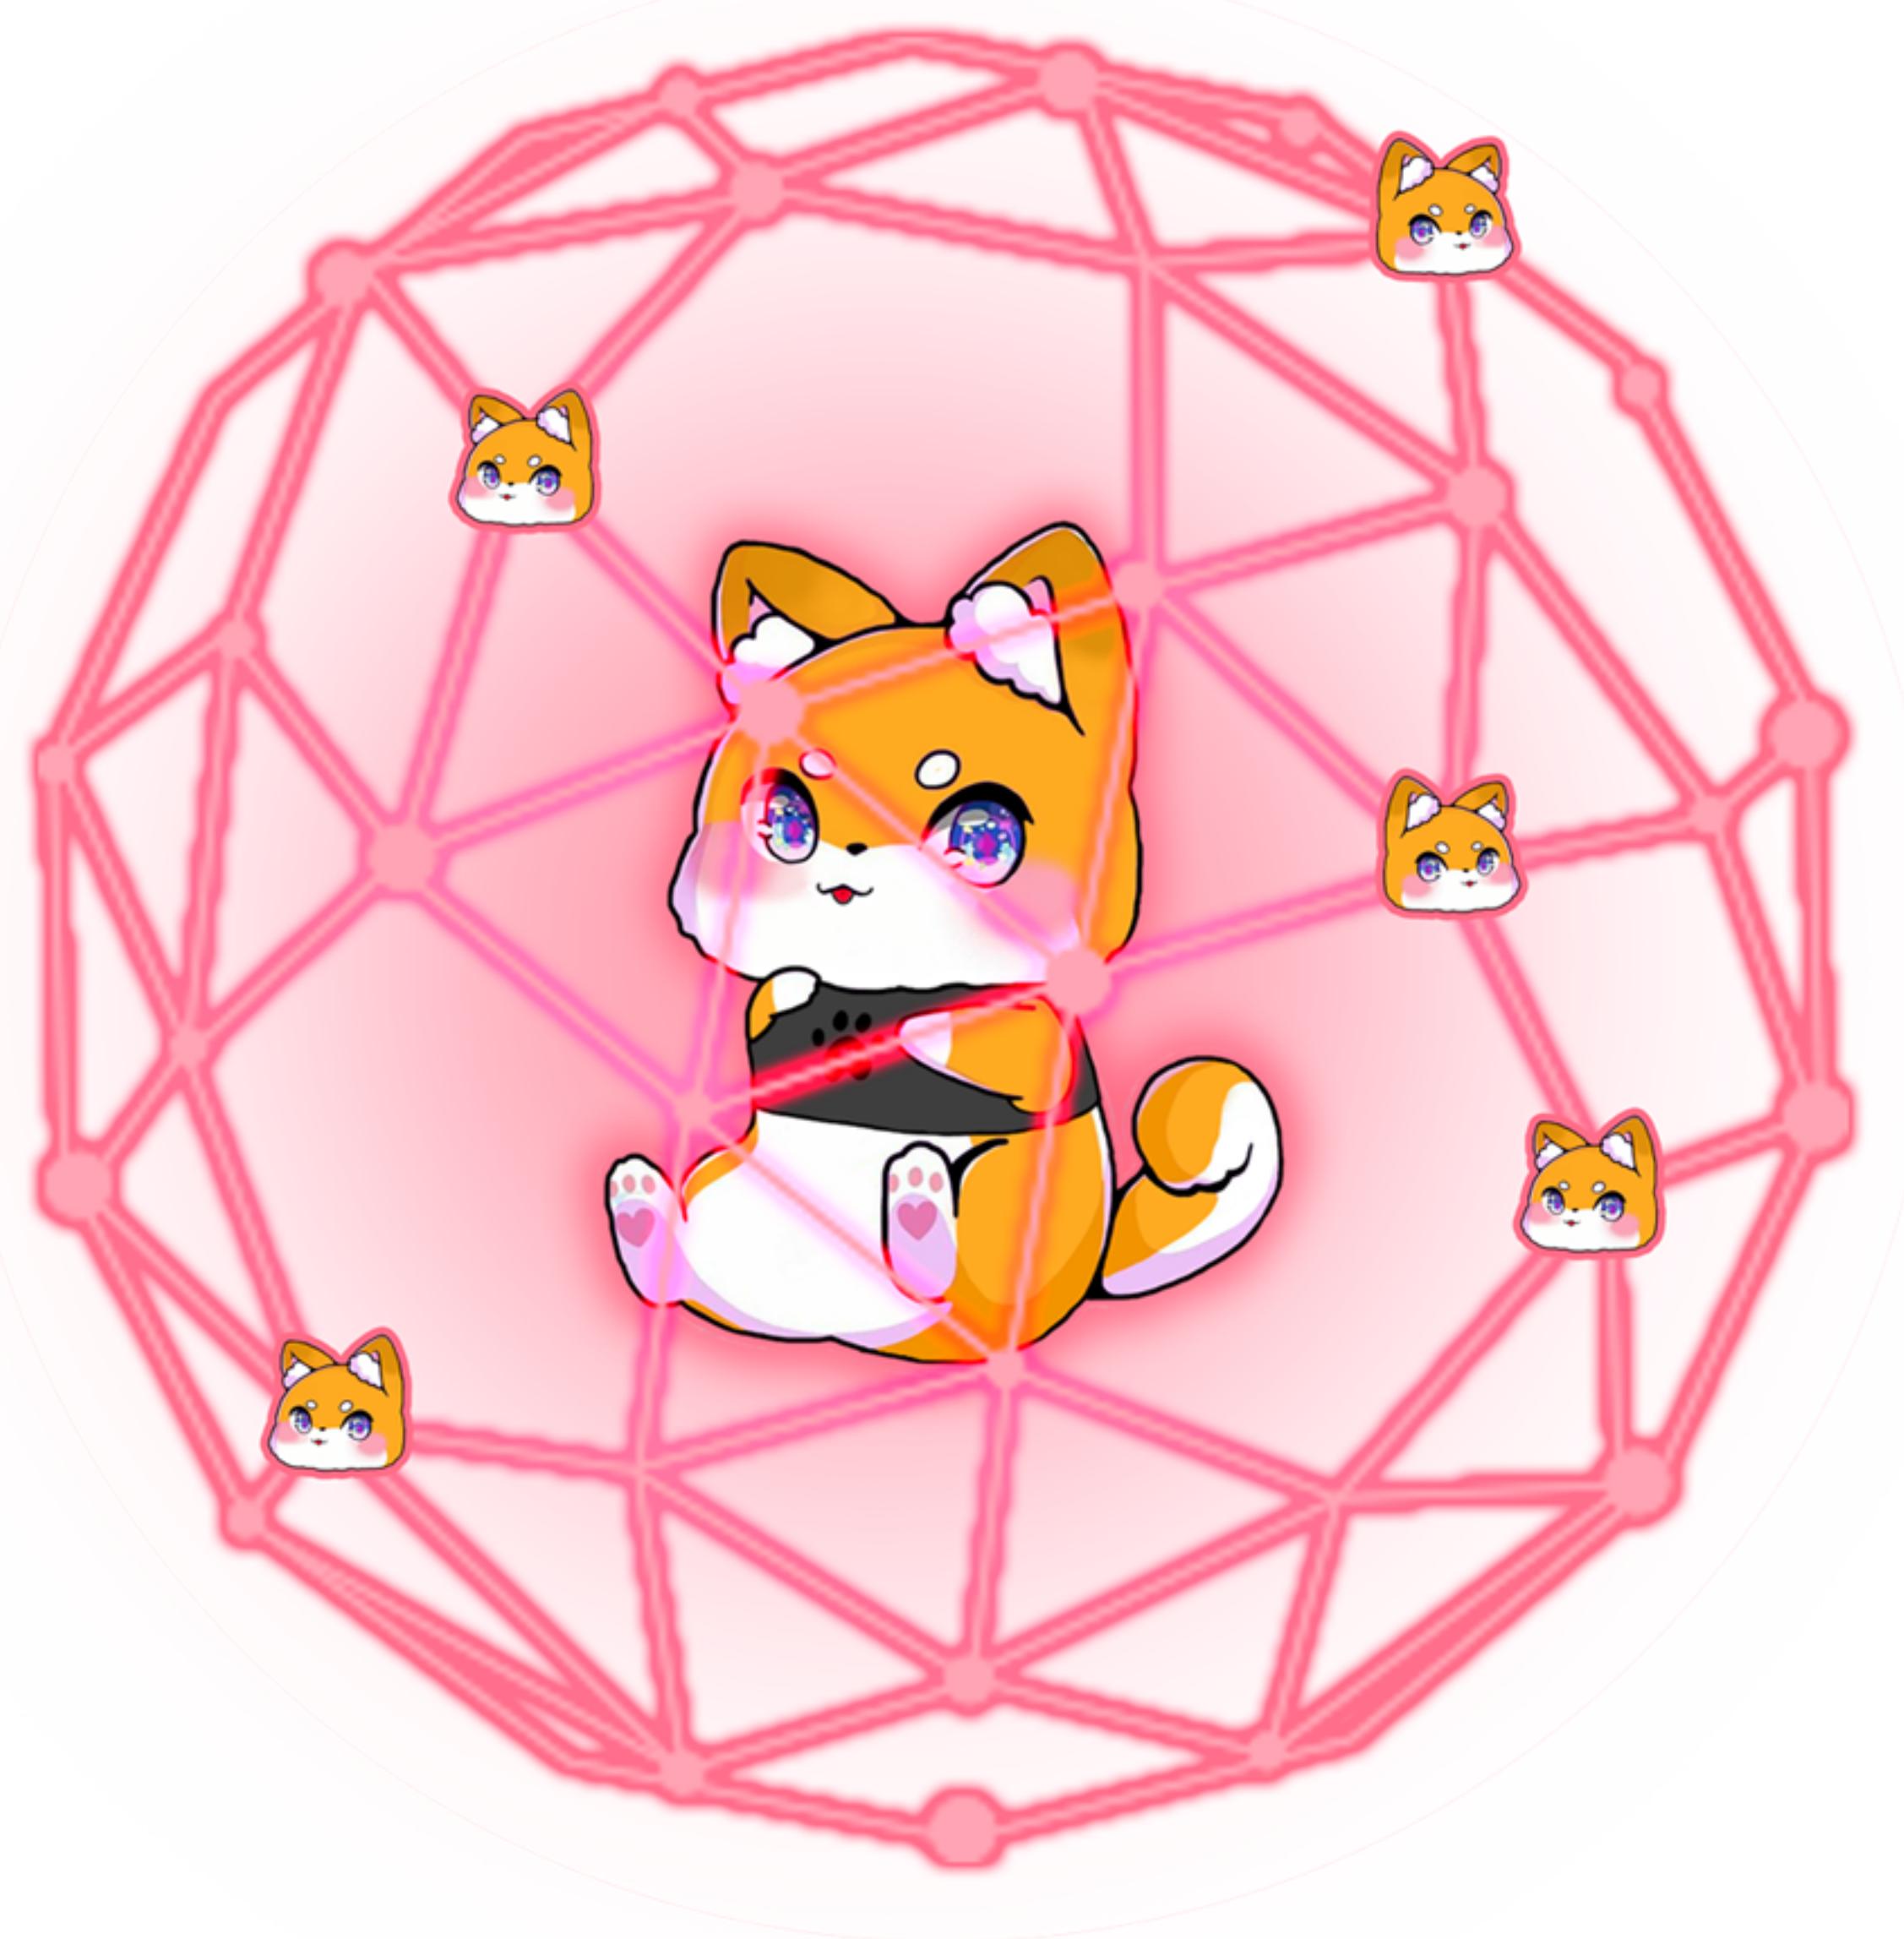

Any project can be useless without a nice community support, always there should be some people using the services of a project so we can call the project useful. Just like any other project, our project is going to need marketing. We believe in our community and we are sure our community members are going to help us with growth and expanding our project. There won't be any referral program but we may have an event with rewards for inviting new members. We believe our airdrop event is going to be very effective but not enough and that's why we have prepared some marketing fees. It is going to be done without causing problems for our ecosystem.

# FUTURE VISION

SisDoge is actually the future! A useful project supported by any blockchain with high interest rates and low fees. Everything starts somewhere somehow but what matters is actually the future of that project. We had the mission of starting the project and leading the improvement for a better crypto service experience but at some points everything depends on the community like how they vote and participate in the events and of course how they share their idea. Communication is the key of growth.

# LEGAL

The following litepaper consists of information given for discussion purposes only and does not represent investment advice of any kind. Further, it does not constitute an offer to sell shares or securities nor does it constitute a solicitation to buy such shares or securities. None of the information found within is intended to influence any investment decision nor should it be the basis of an investment decision of any kind. Investments should only be made with the help of an independent financial advisor within context of the countries of their citizenship or residence, and their place of business with respect to the acquisition, holding or trade in \$ISDOGE or any other tokens. Those for whom it is unlawful to participate should not participate. Consult with your own lawyer or accountant to determine whether it is lawful for you to participate in this token sale. For each revision cycle, we will provide notes on what has changed the justification for the change. We update the litepaper so the versions which are found outside of the official SisDoge website may contain out-of-date or inaccurate information. The most up-to-date version of the litepaper will be located online at [sisdoge.org](http://sisdoge.org)

# MARSMAP

## Q1 2021

- Project Research Started
- Contact Development
- Smart Contract Deployed
- Website Launch
- Team & Development
- Tokens are Locked in the Smart Contract
- Pre-Sale
- Liquidity Adding on PanCakeSwap(V2)
- LiveCoinWatch listing
- CMC & CoinGecko listing
- Lottery Program Started
- Airdrop Program Started
- Media Partnership Announcement

## Q2 2022

- CEX Listing
- Partnership Announcement
- SisDoge Wallet Launch
- NFT Marketplace

## Q2 2022

- Major Partnerships
- Innovation Program Started
- Sis-Swap
- Further Exchanges Listing

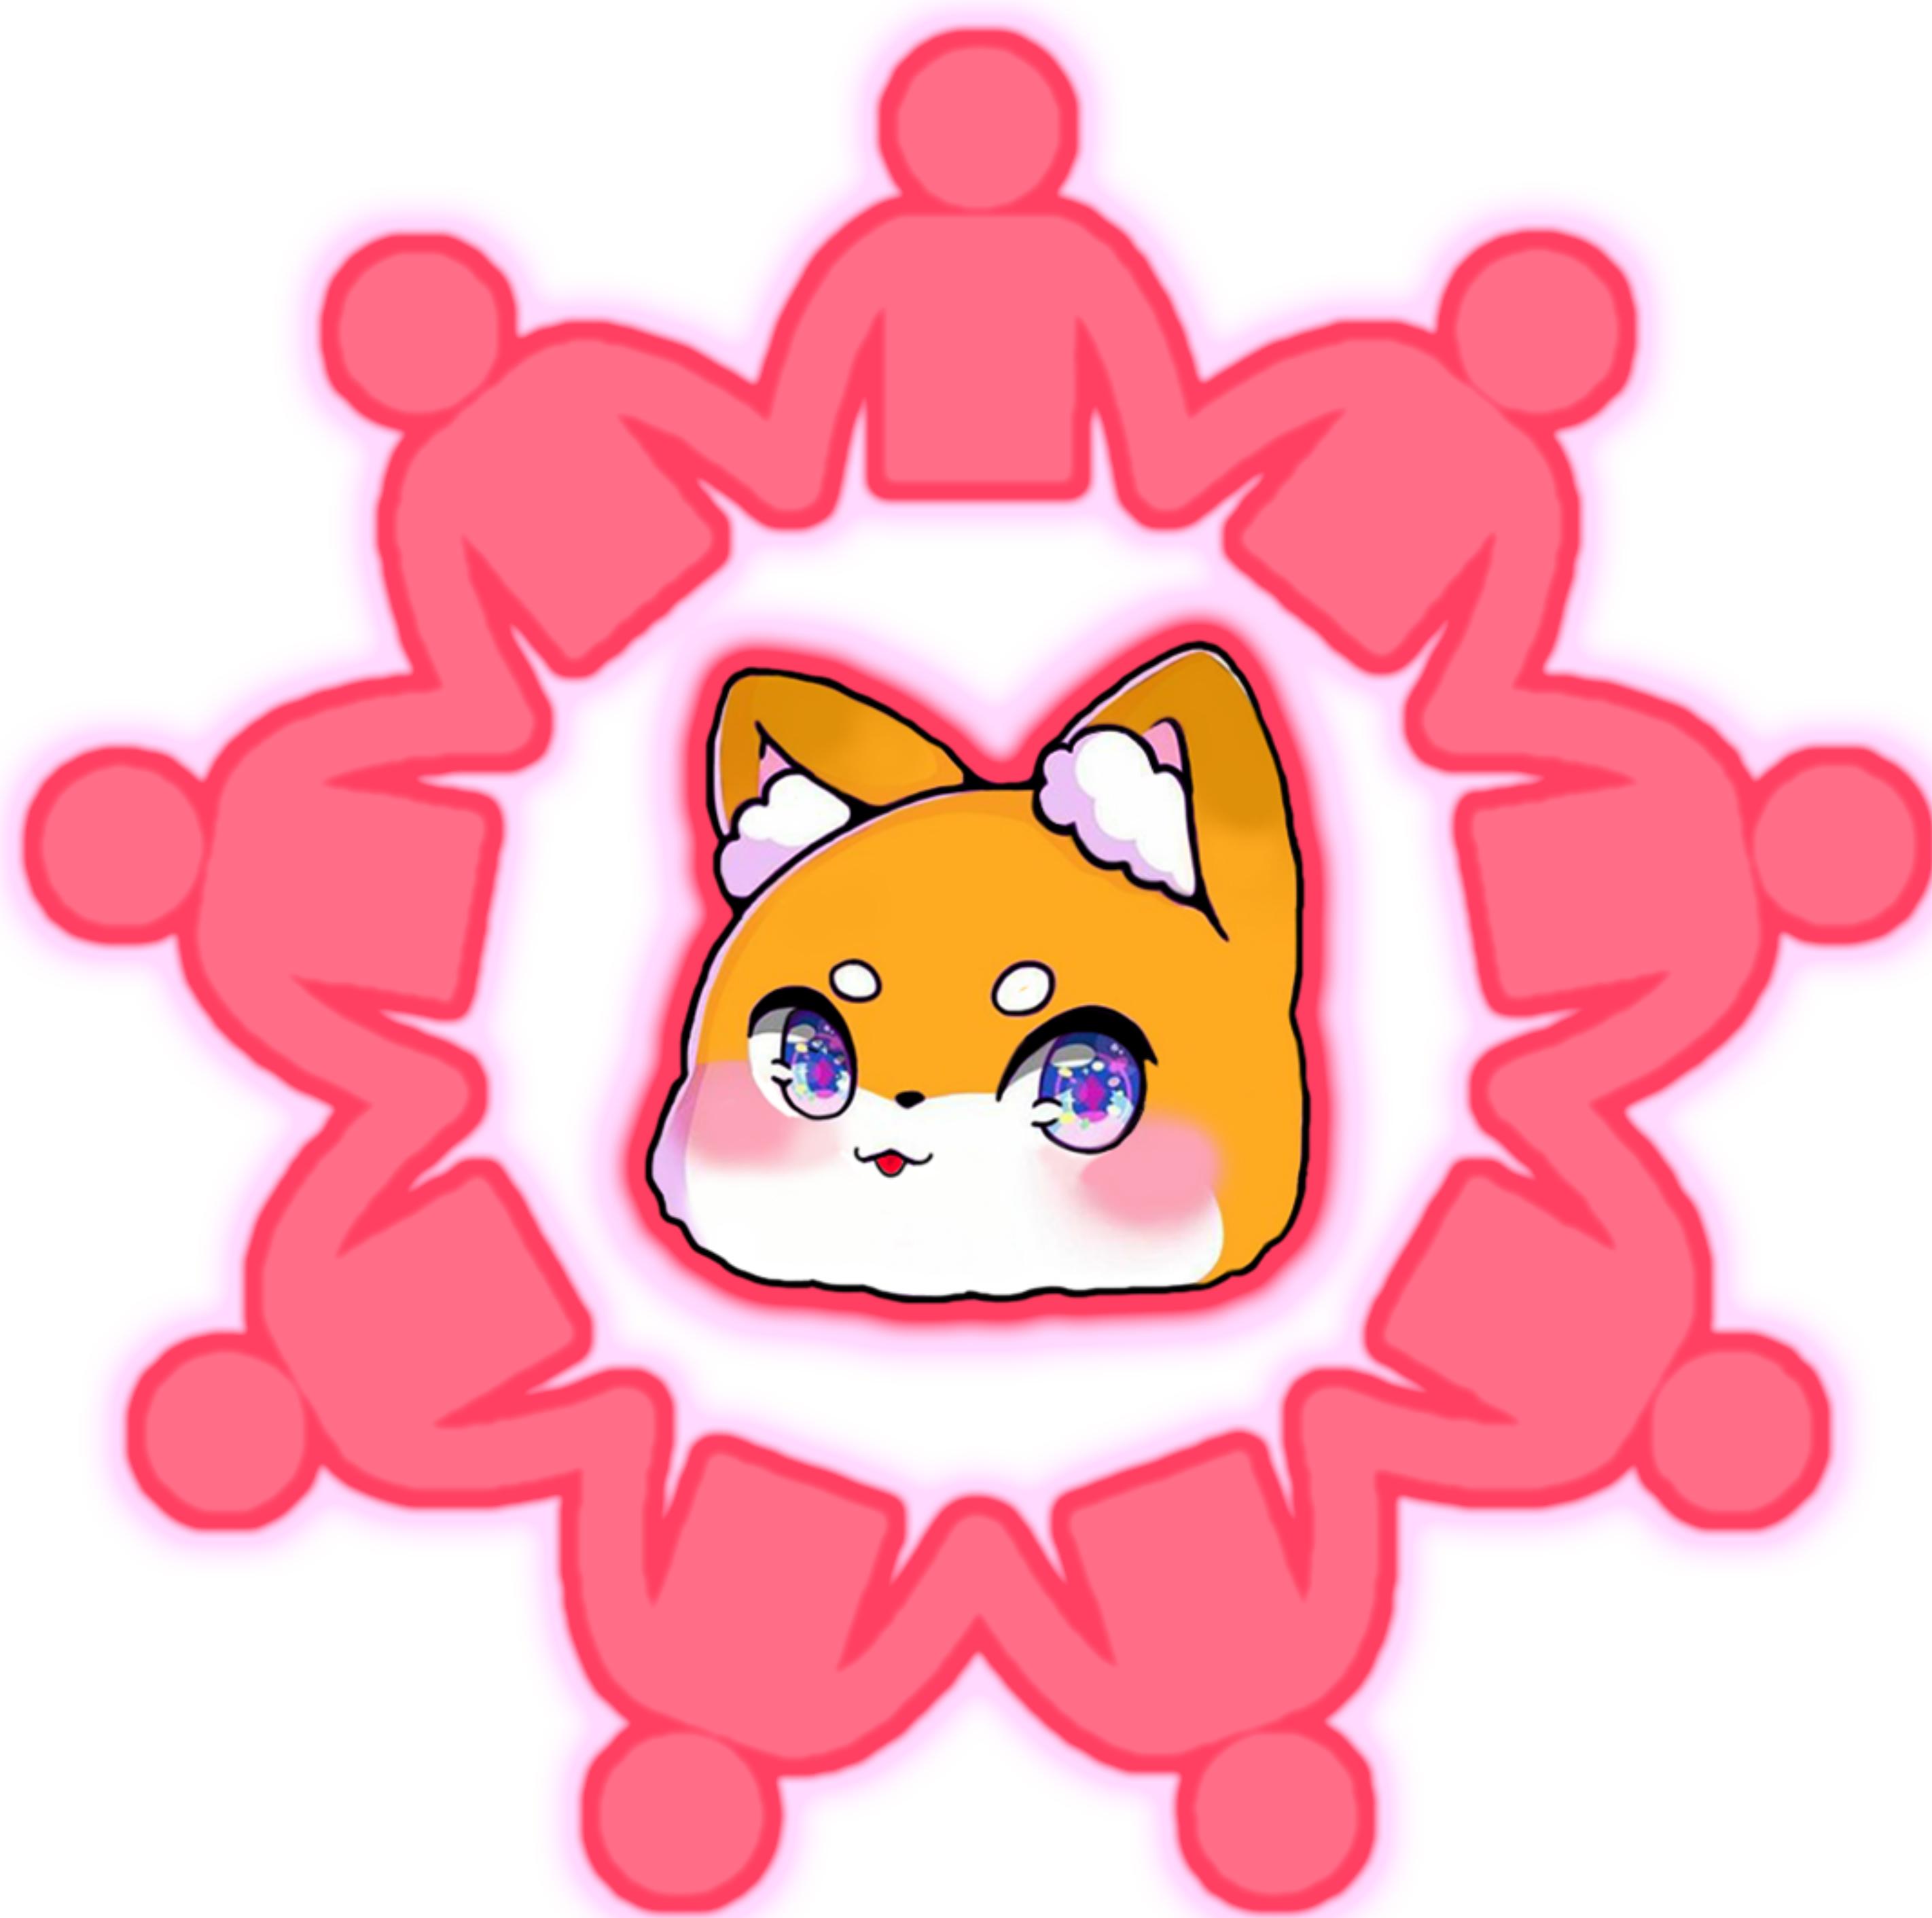

# AUDIT

You can use the link below for checking the Audit report, please read the details. Also the project is open source, so you can read the contact and check everything yourself. There will be a bounty program for other contracts and details of the events will be announced in our social platforms.

[Check the audit report here](#)

## COMMUNITY

Community is everything! Basically, it's key to success for any meme token. We are trying our best to support our community for expanding and being more successful every day. A big group of our members are involved in events and our project which encourages other people to be a part of this community and trust us so we can improve our system. Using the links below you can contact us and share your ideas.
